

## NEW! ALT II SHOULDER PAD FEATURES

TAG's new and improved ALT shoulder pad provides maximum protection with honeycomb foam while actually taking weight out of the pad. Honeycomb comes from the shoe industry, designed to be light weight and high energy absorption material. With removable deltoid pads and belt & buckle hook up system any player can get the perfect fit in the ALT. Our two layer clavicle build ups are designed to absorb and transfer energy from impact around the pad for extra protection for the player. Our new epaulet made from clear polycarbonate material is one of the strongest in the industry. With the anti-microbial, breathable sandwich mesh lining the ALT also features:

- |                              |                          |   |
|------------------------------|--------------------------|---|
| Honeycomb Foam               | Shoulder Cap Straps      | Polycarbonate Epaulets                      |
